

Borthwick Vineyard

2012 Pinot Gris

Region: Gladstone, Wairarapa, New Zealand

Grapes: Pinot Gris

Analysis:

Alcohol: 13.5%

Total acid: 5.1g/l

PH: 3.48

Residual sugar: 3.80gms/l

Tasting notes: Perfumed aromas of apricots, nectarines and green pears. A rich mid-palate displaying mild oak influence. The wine finishes dry and crisp with lingering hints of warming spice.

Vintage Conditions: 2012 was one of the coolest seasons we have experienced. An unusually cool spring and summer meant that the vineyard cycles were delayed by up to three weeks. However, autumn was one of the best we have ever seen, with long dry spells and great temperature variations. The result is some of the most aromatically intense white wines we have produced.

Viticulture: Pinot Gris is the new variety in the vineyard for Borthwick Estate, planted in the springs of 2006 and 2007, we chose some of the newest planting material in New Zealand and grafted on to a rootstock that makes the vine work hard to access nutrients and water. The struggle of the vines allow us to restrict the crop load to a minimum, practicing extensive shoot and fruit thinning to ensure the vine is balanced. Acidity is a key factor when choosing to harvest our Pinot Gris; picking decisions are made to ensure there is an acid structure to the wine.

Winemaking: The harvested fruit was processed quickly into tank to retain the vibrant aromas and fresh acidity. The juice is then split into two parcels, one of which is run into older French oak barrels, while the other remains in tank. The tank portion is fermented slow and cool to retain the varietal characters of Pinot Gris, while the barrel ferment is undertaken at warm temperatures to build palate weight. The wines are aged on yeast lees for seven months before blending, fining and filtration.

Oak Handling: 33% fermented and aged in old oak with the balance in tank.

History: Established in 1996 the family owned and managed Borthwick Vineyard produce wine with flavours that are a direct reflection of the Gladstone region, New Zealand. Ancient stony, alluvial soils and cool climate allows the grapes to grow in harmony in their environment. Sustainable practices and minimal intervention in the vineyard and winery allow our wines to display their distinctive single vineyard characteristics and flavour.
